

# FloorSink DEFENDER™

All-Natural Bacterial-Based Puck Device

FloorSink DEFENDER is a uniquely engineered device that is designed to fit within your floor/mop sinks. FloorSink DEFENDER takes advantage of our proprietary bacterial compound to eliminate grease, oils and fats along with fruit flies that can cause problems. As liquid runs over top of dome puck it will gravitate under dome, and slowly release the bacterial puck into the floor sink drain.

The FloorSink DEFENDER is a passive device that is simply placed in any size floor/mop sink without any tools, assembly or complicated procedures. Once you placed it in your floor sink, let the FloorSink DEFENDER do the dirty work. It is designed to last for about 10- 15 days (depending on liquid flow) and the FloorSink DEFENDER merely becomes part of your monthly maintenance schedule.

FloorSink DEFENDER's proprietary bacterial compound puck that is a non-caustic, pesticide-free, all-natural, organic compound composition that turns fats, oils, and grease into carbon dioxide and water.
